COTTON CHATS
TRADE-MARK REG. U.S. PAT. OFF.
DRAPER CORPORATION
HOPEDALE MASS.

No. 225. JULY 1921

REPAIRS AND SUPPLIES

are needed from time to time on all kinds of machines, and cotton machinery is included in this general statement.

Looms, which are subject to severe duty, require perhaps greater attention than other machines used in cotton mills. Shuttles and bobbins must be replaced. Cams and other parts wear.

We have added to our machinery and equipment during the past few years so as to greatly increase our capacity for turning out bobbins, shuttles and drop wires with view of giving our customers better service. We can now fill orders for these and other supplies within a reasonable time and with products that are much more certain to fit looms of our manufacture than goods made by parties without our interest in the working of the Northrop looms on which they are used.

Our loom castings are made on the same moulding machines and finished by the same tools and special fixtures that are used in producing the looms. Our repairs are therefore standardized in a way that is not possible on repairs made by outside parties or in local machine shops.

MIRROR DROP WIRES

TRADE-MARK REG. U. S. PAT. OFF.

Having greatly improved the finish of our
Northrop Loom Drop Wires
we have adopted the trade-mark

MIRROR

to identify the drop wires of our manufacture and each shipment will contain a slip bearing this trade-mark.

We request our Northrop Loom customers to look for this name which will guarantee the high quality of the drop wires.

OUR THREAD-CUTTING LOOM TEMPLES

have been re-designed during the past few years and our present pattern with solid cutter, illustrated on page four, is a great improvement over anything heretofore made. The solid cutter after a trial of more than two years has shown practically no indication of wear, while doing its work most effectively.

This temple is made in several sizes to fit our various looms and the solid cutter is being adapted to other types of our temples for different classes of weaving.

WE RECOMMEND THE USE OF HASTINGS' PATENT METAL BUSHED NORTHROP LOOM BOBBINS

which reduce the annual expense for bobbins notwithstanding the added cost of the metal bushings.

We can furnish either feeler or cone bobbins for Northrop Looms and with any desired outside shape and to fit centrifugal clutch or other standard spindle.
